LETTUCE: * = most widely used varieties

MULTI-LEAFED LETTUCE

<p>Multy</p>	<p>New fast growing lettuce type with many identical leaves, leaves are a very uniform, dark, shiny green with uniform, fine serrated leaves. Leaves are crisp, but still flexible and easy to bag.</p> <p>Very strong against tipburn with excellent shelf life. Both for processing and fresh market</p> <p>Suitable for soil production and hydroponics</p> <p>Resistance: Bl: 3-9,11,12,15-25</p>	
<p>Multiblond1</p>	<p>A paler Multy type, Long Day. Compact plant, medium bolting tolerance. Good weight. Nice blond color and plant shape. Thick and well curled leaves. Good volume and number of leaves. Good uniformity of the final product. Resistance: Bl1-25, Nasanovia.</p>	
<p>Multiblond2</p>	<p>A paler, finer curled Multy type, Short Day, Compact plant, Fast bolting and good weight. Brilliant blond color and nice plant shape. Good weight and yield. Thick and very curled leaves. Very high number and good volume of leaves. Nice presentation of the final product. Resistances: Bl1-25.</p>	
<p>Multigreen1</p>	<p>A very fine curled Multy type, Long Day, Compact plant, good bolting and medium weight. Nice brilliant green color. Good bolting. Thick and very fine, well curled leaves. Very good shelf life, presentation and volume of the leaves. Resistance: Bl1-25, Nasanovia.</p>	

<p>Multigreen2</p>	<p>Multy type, Long Day. A big plant, good bolting and high weight. Multy type with more vigor. Nice brilliant green color. Good bolting. Thick and well curled leaves. Resistance: Bl1-25, Nasanovia.</p>	
<p>Multigreen3</p>	<p>A more coarsely Multy type, Short Day. Good vigor with good compactness, medium bolting and very good weight. Nice green color and nice round shape of plant. Good thick leaves. Good uniformity and medium volume. Very high number of leaves. Resistance: Bl1-25.</p>	
<p>Multired2</p>	<p>A very finely curled red Multy type, Long Day. Compact plant, medium bolting and medium weight. External pale red and internal green color. Very thick, fine and very curled leaves. Very good shelf life. Very fine stems with high volume of leaves. It has a perfect presentation. Resistance: Bl1-25.</p>	
<p>Multired3</p>	<p>A slow bolting red Multy type, Long Day. Nice Compact plant, good bolting and medium weight . Dark red color. Medium size of plant. Medium thick leaves and nice curliness. Good uniformity of leaves. Good volume and presentation. Resistance: Bl1-25.</p>	
<p>Multired4</p>	<p>A red Multy type with oak leaf shaped leaves, Long Day. Good vigor of plant, but not compact, good bolting and low weight. Brilliant red color. Upright plant shape. Thin and smooth leaves. Very big leaves and lower uniformity of product. Medium shelf life. Very nice plant. Resistance: Bl1-25.</p>	

<p>Multired5</p>	<p>Red Multy type, Short Day. Medium volume of plant, very fast bolting and medium - low weight. Open plant. Nice red color. Better results in winter. Medium thickness and curled leaves. Good uniformity and medium number of leaves. Good volume of leaves. Resistance: Bl1-25.</p>	
-------------------------	--	---

BUTTERHEAD LETTUCE Long Day Varieties.

<p>Alexandria</p>	<p>Alexandria is a newer summer variety of Butterhead lettuce for indoor cultivation. It has good size and performance and is an easy summer variety (long day). Alexandria RZ can be grown on NFT, as a soil-grown crop and in floating production. It is very strong against tipburn and bolting and is very easy to cut.</p>	
<p> Astraca</p>	<p>Astaca is a dark green, large-framed butterhead with a broad, healthy, well-closed bottom. The variety is strong on internal tipburn. Thanks to the loosely filled heads, it has good field keepability. Astraca performs well in Mediterranean winters. Available as conventional or Organic seed</p>	
<p> Brighton</p>	<p>Brighton is our new medium sized butterhead with a strong bottom and well-filled, good closing heads. The variety is strong on tipburn and very strong against Bremia (HR Bl:1-26). Available as conventional or Organic seed</p>	
<p>Charles</p>	<p>Charles is a large framed long day variety for late spring, summer and early fall cultivation. It is a medium sized, thick leaved variety with an attractive color that is slow bolting and strong against tip-burn. Resistance: Bremia races 1,3-10,14-22. Recommended sowing period 20th Dec to 25th Aug.</p>	
<p>Elton</p>	<p>A butter head / Boston lettuce suitable for long day conditions. Elton is large framed and has a strong leaf structure with an attractive color. Elton has a strong resistance to tip burn and is resistant to Bremia BL 1-17, 19 & 21 .</p>	

Flandria	Flandria is one of the standard glasshouse butter head varieties for production from the spring to autumn. It is slow bolting and strong against tip burn, forming a well closed base. Resistant to BL 1-17, 21, 23.	
Frank	Butterhead Lettuce Frank A great shaped lettuce, with a well filled head and a good balance of outer leaves. Frank is a heavy lettuce with a high resistance level. Very versatile plant, widely adapted to different seeding periods NR:0, BL: 1-26,28	
Laurel	A very variety rugged and suitable for a wide range of conditions and does well in the humid tropics. Uniform, with a medium green color. Tipburn tolerant and resistant to Bremia BL 1-4, 6,7,10, 13-15.	
Natalia	Natalia is a newer butterhead lettuce from RZ. Natalia RZ is a large butterhead. The leaves are medium thick with a blonde to mid-green colour. It is strong against tipburn and bolting. It also has a clean, well shaped base. Resistances: HR BI: 1-26 / Pb	
* Rex	A thick-leaved summer type but often used year round. Excellent quality, slow-bolting and very strong against tip burn, with a nice, clean and well-closed base, its leaves are not brittle and it is easy to cut. Resistant to Bremia BL 1-12, 17, 18, 22.	
Skyphos (RED)	Large size Red Butter that is a ruby color halfway down the leaf with a brilliant green color contrast towards the core. It has great texture, slow bolting and very attractive, making it suitable for both Processor and Carton. Resistant to HR BI:1-26/Nr:0, IR LMV.	

BUTTERHEAD LETTUCE - Short Day Varieties

Fidel	A short day variety for winter and spring cultivation. Medium to large framed. Good on tip burn. Performs well under low light conditions, strong head with well closed base. Bremia races 1-25	
--------------	---	---

LOLLO ROSSA LETTUCE

<p>Amandine</p>	<p>A triple red variety with intense color recommended for spring, winter and autumn. Suitable for indoor and outdoor cultivation that can produce large heavy heads. Resistant to BL 4-16, 21 and 23.</p>	
<p>Revolution</p>	<p>A Lollo Rossa type with a good red color. Revolution is slow bolting and has good vigor. Suitable for indoor and outdoor production. Resistant to Bremia BL 1-16</p>	
<p>Soltero</p>	<p>A Lollo Rossa type with a good red color. Suitable for indoor and outdoor production. Resistant to Bremia BL 1-25</p>	

LOLLO BIONDA LETTUCE

<p>Granite</p>	<p>Robust lollo bionda with darker green color. Nicely curled and strong leaves, compact growth habit, good vigour, slow bolting. Resistances: Nr: 0, Bl: 1-26, 28</p>	
<p>Locarno</p>	<p>LOCARNO RZ is a slow-bolting variety suitable for outdoor cultivation. Large-framed variety with light green and glossy leaves, even under hot conditions. The leaves are densely incised. Open headed, even under Mediterranean winter conditions. The base is greener when compared to standard varieties. Resistant to Bl:1-16,21,23.</p>	

OAK LEAF LETTUCE (Green)

<p>Cedar</p>	<p>A blond oak leaf type with a medium sized, well filled open head, recommended for indoor and outdoor production. Resistant to Bremia BL 1-26</p>	
<p> Pagero</p>	<p>Pagero has a highly attractive, nice fresh green colour. Moreover, this big-sized variety has very regular heads. It is suitable for harvest in the winter and spring.</p>	

OAK LEAF LETTUCE (Red)

<p>BUGHATTI (Red) NEW!</p>	<p>Bughatti is a vigorous red oak leaf with healthy base and strong root system. Performance in NFT systems is very stable and reliable. In comparison to Bughatti Navara has a more upright growth habit and has a more brilliant red color. The vigor of Navara is lower than Bughatti</p>	
<p>Versai (Red)</p>	<p>Red Oak leaf type. Performs well under warm conditions, smooth texture with open head and uniform leaves.</p>	
<p>Navara (Red)</p>	<p>Compact and upright triple red oakleaf. Attractive shiny red leaves. Slow to bolt. Resistances: Nr: 0, Bl: 1-26</p>	
<p> Piman</p>	<p>This very well filling new oakleaf variety has an attractive red color and a nicely closed and clean bottom. The heads are flat, mid-sized and very well filled.</p>	

GREEN LEAF LETTUCE (Grand Rapids Type)

<p> Kismy</p>	<p>This dark green open batavia gives a good volume and is becoming a standard for winter production in France and Italy.</p>	
---	---	---

COS / ROMAINE LETTUCE

<p>Amadeus</p>	<p>A Cos lettuce with a uniform, upright frame. The head is well closed and uniform in shape that makes more leaves than comparable varieties. Resistant to BL 1-17, 21 and 23.</p>	
<p>Counter</p>	<p>Romaine lettuce Counter is a newer but very successful introduction from Nunhems with excellent results. Counter is specifically bred for hydroponic/greenhouse production. Unlike field varieties, it is small framed and exceptionally fast to maturity. Resistant to BL 1-16,19 & 23. Highly adaptable for greenhouse and heat tolerant.</p>	
<p>Helvius</p>	<p>Helvius is a large frames Romaine with good tipburn resistance. Helvius romaine makes heavy, dense hearts and while used midseason in field production, it is also very well suited to greenhouse and hydroponic production. Resistant to DM races 1-27, NrO, LMV, and Common Rust</p>	
<p>Intred NEW</p>	<p>Red little gem with unique internal red color. Very nice heart shape, medium size, good shelf life and medium bolting tolerance. Resistances: Bl: 1,3-13,18,22,25,27</p>	
<p>Noga</p>	<p>Romaine Noga is a leading romaine variety for hot climates. Moderate blisters. Av. Weight (gr.): 700-1200 Head Shape: Open upright head, Rib Appearance: Slightly pronounced Color: Glossy Green, Planting Season: Summer Maturity (days)* Summer: 35-45, Winter: 90-110 (Available as raw seed only)</p>	
<p>Thumper</p>	<p>Thumper is a compact Little gem lettuce with a good uniform head shepe. The variety is very stable, strong against tip burn and very slow bolting. Thumper is an excellent choice for greenhouse crops Bremia resistance 1-28 and Highly resistant to Nasanovia</p>	

CURLY LEAF LETTUCE

<p>Charita</p>	<p>Curly lettuce Charita is a long day variety with attractive appearance and good texture. Resistance to BL 1-16,19,21. These novelty type lettuces provide an attractive addition to the standard butterhead lettuce varieties and are popular with restaurants and at farmers markets.</p>	
-----------------------	---	---

ENDIVE

<p>Frenzy</p>	<p>Endive Frenzy is a heavy, uniform Tres Fine-type endive with finely curled, deeply cut leaves. The heart blanches to a creamy yellow, and its leaves grow large. Frenzy is widely adaptable and performs well under many different growing systems.</p>	
----------------------	--	---

ICEBERG LETTUCE

<p>Galera</p>	<p>Experience in the tropics and subtropics is limited, but Galeras' excellent bolting and tipburn resistance, earliness and head formation make this variety adapted to warm climates. Resistance to BL 1-16,19,21,23</p>	
----------------------	--	---
