TOMATO: * = most widely used varieties

BEEFSTEAK TOMATO

<p>Beorange (Orange)</p>	<p>Average fruit size 170 - 190 grams (6.0 - 6.75 oz) Large Uniform, orange beef steak. TmC5VF2FrWi</p>	
<p>Beverley</p>	<p>Average fruit size 160 grams (5.7 oz) Well suited and widely used in the tropics with good heat tolerance, large fruit with long shelf life. TSWV/ ToMV/ Ff:1-5/ Fol:0,1/ For/ Sbl/ Va/ Mi</p>	<p>-</p>
<p>Bigdena</p>	<p>Average fruit weight 220 - 280g (8 - 10 oz). Bigdena produces very high yield, good fruit shelf life, and strong vigor. Bigdena is an open plant type that is easy to maintain and has low labor costs. It can maintain its size and shape under high temperature and light conditions.</p>	
<p>Brightina</p>	<p>High early and total production, ppen , balanced plant type with fast cluster development and setting of fruit. Deep red, high quality fruit with nice shine. Strong against micro cracking. Excellent shelf life and firmness. Slightly ribbed fruit shape with low calyx. Less fruit damage. ToMV, V, Fol1-2, Ff1-5, For</p>	
<p>Caiman</p>	<p>Beefsteak tomato Caiman is an early variety suitable for greenhouse and open field production Weight +/- 270 grams (9.5-10 oz) One of the new generation of Enza Zaden tomatoes with very good quality fruit, great production</p>	
<p>DRW 7749 Rebelski</p>	<p>Average fruit size 220 grams (7.8oz) A large fruited, labor friendly plant with an open structure and balance generative growth character. Good shelf life and very high potential yield. Powdery Mildew tolerant.</p>	
<p>*Geronimo</p>	<p>Newer variety but already one of the most widely used beefsteak varieties. Average fruit weight 240g (8.5 oz). High yield from a well balanced plant. Fruits are very large, firm, nice color and good taste. Performs better under glasshouses, lower density and later planting</p>	

Growdena	Average fruit weight 220 - 280g (8 - 10 oz). Growdena produces a vigorous plant that is open and keeps very good leaf length. It features uniform fruit, good firmness, good setting in the summer and high yield. Growdena is a greenhouse beef tomato that produces the large sizes desired by the NAFTA market.	
Rapsodie	Average weight of 190 -252 grams (7 - 9 oz) Rapsodie is a beef variety for active glasshouse production. Very good regular shape, nice round and a very early variety. Good plantation in low light conditions, fast plant development, and flat leaves. Easy to handle and low labor cost.	
Trust	Average fruit weight 200 - 210grams (7 - 7.5oz) One of the most popular varieties in production today. Large fruits with uniform ripening. Moderate vigor but high production. Suitable for many different climatic conditions and growing systems.	
Tomimaru Muchoo (Pink)	Average fruit weight 160 - 180 grams (9.0 oz) Pink beef tomato for loose harvest. Fruits are a deep shiny pink color and very uniform in shape with good taste A high yielding, moderate vigor plant, fruit with Brix 5-7.	
Torero	Average fruit weight 250grams (7 - 7.5oz) One Red beef tomato with big fruit size and a very high yield. Tall labor friendly plant with a balanced generative character. Grafted on Maxifort this variety is advised for year round crops. Fruits are very firm and have a very good shelf life. The plant has Torado virus resistance	

CHERRY / GRAPE TOMATO

Amsterdam	Average fruit weight 17 - 20 grams (0.6 - 0.75 oz). Amsterdam is an newer introduction with grape shaped fruit with excellent flavor. Brix 8+.	
Camelia	Average fruit weight 15 - 20 grams (0.5 - 0.75 oz) An early variety with strong vigor with good shelf life.	-

*Cello	Average weight 12-15 grams. Very sweet and tasty plum cherry/plum shaped tomato used in both protected and field (staked) loose harvest crops. Cello has a very good flavor with a Brix of 7-10 and strong tolerance to cracking. Fruit has a good shelf life.	
Conchita	New! Average fruit weight 20 grams (0.75 oz) Long shelf life and firm fruits. Calyx stays green. Conchita may be used for truss harvest.	
Dasher	Fruit weight of 15-20 grams (0.5 - 0.7 oz) Grape shape with an excellent flavor and a brix of 8+ TmVF2N.	-
Favorita	Average fruit weight of 15 grams (0.5 oz). Red, semi greenback cherry tomato Favorita has a vigorous slightly stretched plant with long trusses, many double. Excellent flavor and fruit shape.	
Goldita	Yellow cherry.	-
Santaorange	Orange Grape.	-
Sweetelle	Average fruit weight 10 – 12 grams (0.35 - .45 oz) High production and excellent shelf life. Tall variety with outstanding flavor. Strong against microcracking and fruit drop.	

COCKTAIL TOMATO

Flavorino	Average fruit weight 35 grams (1.25 oz). A Roma or Plum type, with a regular, flat truss shape. Tall, vigorous plant with possible truss harvest but should ideally be grafted with Beaufort or Maxifort a long crop to gain resistances and vigor. Foliage tends to be lush. Truss can produce 7-9 fruit on a flattened truss and fruit is very tasty.	
Goldino	Yellow cocktail	-
Picolino	Average fruit weight of 20 grams new cherry with long shelf life very firm fruits calyx stays green very vigorous growth possible truss harvest good taste and color. Excellent flavor TmC5VF2FrWi	

COCKTAIL TOMATO (continued)

Orangino	Orange cocktail	-
Red Delight	A round cluster harvest cocktail type. Average fruit size 55 grams (1.8 - 2.0 oz). A tall vigorous variety that is early into production and can be pinched or grafted. Firm, deep red shiny fruits, up to 10 per cluster, with a good shelf life, high tolerance to cracking and a brix of 6.0+. Disease resistance TmC5VF2FrWi.	

TRUSS TOMATO

Clermon	Average fruit size 140 grams (5 oz) Clermon is a vigorous cluster tomato variety with excellent balance and good setting. Well adapted to short days. Uniform fruits with deep red color, nice green parts and very good shelf-life.	
Kommett NEW	Truss tomato Kommett is a newer variety with fruit size averages 155 grams with a high yield potential. Komeett is easy to grow and trusses are very uniform. Grows well under low light conditions. Yield potential is higher than the Clarence but fruit does not have such a full flavor. Kommett is one of our more popular varieties. If flavor is what you need, also look at Topanga.	
Lorenzo (Yellow)	Yellow truss tomato Lorenzo has an average fruit weight 135 grams Lorenzo is a vigorous yellow truss for spring and fall crops. It has very firm yellow fruits with good shelf life and taste.	
Merlice	Truss tomato Merlice DRW 7812 has an average fruit size 155 - 160 grams (2.5 - 5.75 oz) Merlice truss tomato is a new introduction with a nice round shape and excellent uniformity Merlice is highly resistant to powdery mildew - see Tech sheet for resistances	

<p>Topanga</p>	<p>Topanga is a large fruit cluster tomato (TOV) which produces firm, deep red fruit with excellent shelf life. The dark green cluster stem maintains its fresh look and adds to the garden appearance. Topanga's fruit shape is flat, ribbed and the taste is very good.</p>	 <p>Topanga</p>
-----------------------	---	--

HEIRLOOM / SPECIALITY TOMATO

<p>Aurea</p>	<p>Aurea is a unique specialty tomato with low acid and very sweet taste. It has a very ribbed "ox-heart" shape or Coeur de Boeuf and lends itself to specialty markets or as an eye catching item on a farmers market produce stand. An open plant with moderate vigor.</p>	
<p>Belriccio</p>	<p>New! A real heirloom type, 180 -200 grams (6.5 - 7 oz) that has the traditional "ribbed" look but the added advantages of excellent disease resistance package ToMV, V and Nematode.</p>	
<p>Caramba</p>	<p>New! A large green beef steak 200 - 250 gr (7.1 - 9.0 oz) A unique tasting variety that colors from the inside.</p>	
<p>Tiger</p>	<p>Tiger is an Indeterminate Special Cocktail tomato, suitable both for single or cluster harvest. The plant has short internodes and is high yielding plant that is very early. Tiger has a short harvest intervals and resistances ToMV, Ve, F 0-1-2 Fruit is very firm, round and with an average fruit weight of 40 - 45 gr. (1.4-1.6 oz) Tiger fruits have very high Lycopene and an excellent taste and aroma.</p>	
<p>Sacher</p>	<p>Sacher is an Indeterminate Special Tomato Fruit is a Brownish red colour with 5-7 fruits on cluster Fruit weight is approx 5.5-6oz (150 gr) that is firm and with a long shelf life and plant is vigorous and fruit early maturing Sacher has an excellent taste and aroma, ideal for fresh market and specialty sales</p>	

ROOTSTOCK.

Beaufort	<p>Resistances: TmC5VF2FrNK</p> <p>For many years already, Beaufort has been the standard tomato rootstock. The superior vigor and cold tolerance of the variety give added vigor to crops, in soil as well as rock wool. The Corky Root resistance is much higher than can be expected in cultivars and the rootstock Beaufort is the obvious choice for soils with Corky Root infestation.</p> <p>Beaufort has an extremely strong root system which branches very strongly. This obviously results in a very strong plant.</p>
Estamino	<p>Strong, vigorous rootstock with a positive generative effect on the growth of the cultivar grafted on it. An Estamino-graft results in a well-balanced plant with good generative growth. It does not have an excessive vegetative effect on the cultivar grafted on it. The balance in plant growth results into a steady production and all cultivars maintained size and production till the end of the cultivation easily.</p> <p>Estamino is definitely a rootstock for growers that always have issues to control (excessive) vegetative growth of their crop.</p>
Maxifort	<p>Resistances : TmC5VF2FrNK</p> <p>One of the most vigorous rootstocks available. Maxifort is used for the highest potential yield and is excellent for long crops. Great for soil and rockwool. Maxifort is excellent on any variety but is especially good on weak or generative crops. Maxifort greatly improves summer production and significantly increases the length of time that a crop can be harvested.</p> <p>Most popular Rootstock in North America</p>
Multifort	<p>Resistances : TmC5VF3FrN(P)Pto</p> <p>Plant: vigor like Maxifort, amongst the strongest available in commercial rootstocks. Combination of high resistance to Fusarium race 3 combined with nematodes resistance makes the Multifort rootstock an excellent choice for soil grown crops.</p> <p>Using a strong rootstock can expand the life of the plant and increase the average fruit weight.</p>
