All seeds we supply are Non-GMO.
**Arbason**

Arbason is a large beefsteak tomato with an average fruit size of 200-255 grams (7-9oz). It is suitable for all types of production systems including protected agriculture and open field. This indeterminate variety's fruit is large, round and good quality.

**Beorange**

Beorange is an orange beef tomato hybrid with good taste and flavor. Average fruit size 200 - 220 grams (7.1 - 7.8 oz). Nice round shape, good flavor and shelf life. Beorange is a large Uniform, orange beefsteak that adds a touch of color.

**Bigdena**

Average fruit weight 220 - 280g (8 - 10 oz). Bigdena produces very high yield, good fruit shelf life, and strong vigor. Bigdena is an open plant type that is easy to maintain and has low labor costs. It can maintain its size and shape under high temps.

**Caiman**

Beefsteak tomato Caiman is an early variety suitable for greenhouse and open field production. Weight /- 270 grams (9.5-10 oz) One of the new generation of Enza Zaden tomatoes with very good quality fruit, great production.

**Cardinal**

Vigorous plant and short internodes. Fruit weight 300 - 350 grams (10.5 - 12.5 oz). Cardinal produces 4 to 5 large fruits per cluster. Fruits are high quality, firm and have a long shelf life.

**Ducovery**

Growers that are looking for the highest yield potential in our portfolio should stop and take a look at Ducovery. Ducovery is a very large beef tomato hybrid with high vigor.

**Foronti**

Average fruit size 270 - 280 grams. Compare to Torero variety with high quality fruits that hold on the plant. Can produce higher yields than Bigdena. Performs well in areas with high light and hot summers.

**Frederick**

Frederik is for heated greenhouse production and performs well in all conditions, including under periods of low light. This indeterminate, short jointed plant has excellent endurance and strong vigor for long cycles. 7.4-8.7 oz. (210-247 gr.)
**Tomato Beefsteak Geronimo**

Average fruit weight 240g (8.5 oz). High yield from a well balanced plant. Fruits are very large, firm, nice color and good taste. Performs better under glasshouses, lower density and later planting.

**Tomato Beefsteak Grebe**

Grebe is a very high yielding determinate beefsteak tomato suitable for Open Field production. It is a strong, very early plant with a good leaf cover that helps protect against sunburn. Average fruit size is 250 - 280 grams (9 - 10 oz), slightly flat.

**Tomato Beefsteak Growdena**

Average fruit weight 220 - 280g (8 - 10 oz). Growdena produces a vigorous plant that is open and keeps very good leaf length. It features uniform fruit, good firmness, good setting in the summer and high yield.

**Tomato Beefsteak Guillemot**

Guillemot Pink Beefsteak tomato is an early indeterminate variety with a short internodes and a high yield potential and cold weather tolerance.

**Tomato Beefsteak Kivu**

Average Fruit Weight: 260-270 grams. Good setting and final production is high. Nice round shape with a slight shoulder, stable large average fruit weight throughout the season.

**Tomato Beefsteak Marguerite**

A highly productive variety large round fruit, deep red 230 – 260 grams (8.2 – 9.3 oz). Excellent disease resistances and suitable for year round production. Widely used in Canada and North America.

**Tomato Beefsteak Nemesis**

Nemesis is a highly productive variety that has a vigorous plant and big round fleshy fruits with good shelf life. Highly resistant to: ToMV, Vd, Va, Vd, F0-1, For Intermediate resistance to Ma, Mi, Mj, TYLCV, TSWV. 250 - 280 grams (8.9 - 10.0 oz).

**Tomato Beefsteak Owl**

Owl Beefsteak tomato is an indeterminate variety with TY resistance. A vigorous plant and short internodes. Average fruit weight 300 - 350 grams (10.5 - 12.5 oz). Owl produces 4 to 5 large fruits per cluster. Fruits are high quality and firm.
**Tomato Beefsteak Pink Smart**

Pink Smart is a new indeterminate Pink Tomato. It is an Heirloom type (modern Heirloom category) with a great Pink color and firm consistency. It has a Flat, sliced fruit shape with deep regular sutures and a vigorous plant. 230 - 250 grams (8.2 - 9 oz)

**Tomato Beefsteak Rebelski**

Rebelski tomato, previously numbered DRW7749 is a beefsteak tomato variety. Average fruit size 220 grams (7.8 oz). Intended as a competitor or equivalent variety to Trust tomato, it is a large fruited, labor friendly. Good shelf life and high potential.

**Tomato Beefsteak Stealth**

With an average fruit weight 240 - 260 grams (8.5 - 9.5 oz) Stealth is an early, strong plant with high productivity. Fruit is a brown color, firm and flattened globes, high quality with long shelf life and suitable for green harvest. TYLC, ToMV, Vd, Va.

**Tomato Beefsteak Tanager**

Tanager is a high yielding plant that produces large, slightly flattened fruits. Tanager is slightly smaller fruited than Bigdena and Torero but makes up for it with a much improved flavor. Tanager can often achieve a premium because of the higher quality

**Tomato Beefsteak Tomimaru Mu**

Average fruit weight 160 - 180 grams (9.0 oz) Pink beef tomato for loose harvest. Fruits are a deep shiny pink color and very uniform in shape with good taste. A high yielding, moderate vigor plant, fruit with Brix 5 - 7.

**Tomato Beefsteak Torero**

Average fruit weight 250 grams (7 - 7.5 oz) One Red beef tomato with big fruit size and a very high yield. Tall labor friendly plant with a balanced generative character. Grafted on Maxifort this variety is advised for year round crops. Fruits are very firm.

**Tomato Beefsteak Touche**

Growers that rely on high fruit quality through harsh summer conditions. Touche is a uniform, high yield potential beefsteak tomato featuring Powdery Mildew tolerance

**Tomato Beefsteak Tourmaline**

Tourmaline Pink Beefsteak tomato is an early indeterminate variety with a short internodes and a high yield potential. Average fruit weight 250 - 270 grams (9 - 10 oz).
**Tomato Beefsteak Trust**

Average fruit weight 200 - 210 grams (7 - 7.5 oz) One of the most popular varieties in production today. Large fruits with uniform ripening. Moderate vigor but high production. Suitable for many different climatic conditions and growing systems.

**Tomato Cherry Camelia**

Camelia is a very productive hybrid cherry tomato suitable for outdoor and greenhouse production. It is a dual purpose variety that can be harvested as both individual fruits and as a cluster. Camelia offers a fruit of beautiful deep red color and firm.

**Tomato Cherry Conchita**

Average fruit weight 20 grams (0.75 oz) Long shelf life and firm fruits. Calyx stays green. Conchita may be used for truss harvest.

**Tomato Cherry DR0603TC**

DR0603TC is a very versatile variety for loose or truss harvest. Excellent yield potential (same or higher than sweetelle) with excellent taste. Fruit has a smooth skin with a beautiful uniform presentation on a truss with medium plant vigor. Good taste.

**Tomato Cherry DRC1183**

Very good taste and fruit quality. Uniform fishbone trusses with 8 fruits, high yield potential and good shelf life make DRC1183 and excellent choice. 35 - 40 grams (1.25 to 1.5 oz)

**Tomato Cherry DRC564**

DRC 564 Cherry tomato has exceptional yield potential with great taste! High vigor / growth with excellent fruit and truss characteristics. Fruits are a deep shiny red that stay on the vine longer than many other varieties. Average fruit size 18 grams.

**Tomato Cherry Favorita**

Average fruit weight of 15 grams (0.5 oz). Red, semi greenback cherry tomato Favorita has a vigorous slightly stretched plant with long trusses, many double. Excellent flavor and fruit shape.

**Tomato Cherry Felicity**

Cherry tomato Felicity is variety with TY resistant suitable both for indoor cluster production and open field single fruit harvesting. A widely used TY resistant in both greenhouse and open field.
**Tomato Cherry Goldita**

Yellow/orange colored cherry with lovely unique taste, open plant habit.

**Tomato Cherry Kali**

Dark green red with high brix. Very firm fruit, 20-25 grams for Autumn and spring.

**Tomato Cherry Santorange**

Santorange is a crunchy orange plum or grape shaped tomato with excellent taste. Average fruit size 10 - 15 grams (0.35 to 0.55 oz).

**Tomato Cherry SV0948TS**

SV0948TS is a yellow cherry tomato hybrid with good taste, good plant habit and a nice bright color. It is suitable for harvest separately or as a spray.

**Tomato Cherry Sweetelle**

Average fruit weight 10 – 12 grams (0.35 - .45 oz). High production and excellent shelf life. Tall variety with outstanding flavor. Strong against microcracking and fruit drop.

**Tomato Cherry Tomagino**

This variety stands out as being extremely strong against splitting while having a sweet and crunchy flavor. Well balanced plants set fruit nicely and are fast to mature, making it suitable for year round production. 0.6-0.7 oz. (17-20 gr.)

**Tomato Cherry Toronjina**

Toronjina is an orange loose cherry tomato that produces high yields of intense orange colored fruits. Fruits have excellent taste. Strong plants that must be cultivated generatively. Average size: 18-22g

**Tomato Cocktail Annamay**

Annamay is a slightly smaller sized cocktail tomato with an average weight of 1.2-1.4 oz. (35-40 gr.) with an extremely attractive fruit quality and very sweet and aromatic flavor. The trusses are well shaped, compact and very uniform.
**Tomato Cocktail**

**Eider**
Eider is a new "strawberry" shaped cocktail tomato. Average fruit size averages 40 - 45 grams (1.5 - 1.6 oz).

**Tomato Cocktail**

**Flavorino**
Mini plum for loose and truss harvest. Nice color, strong plant, great taste.

**Tomato Cocktail**

**Flavorino**
Average fruit weight 35 grams (1.25 oz). A Roma or Plum type, with a regular, flat truss shape. Tall, vigorous plant with possible truss harvest but should ideally be grafted with Beaufort or Maxifort a long crop to gain resistances and vigor.

**Tomato Cocktail**

**Kahlua**
A specialty brown cocktail tomato Kahlua (Compare to Kumato type). Average fruit size 70-80 grams Indeterminate with good vigor, firm fruit and relatively early maturity.

**Tomato Cocktail**

**Maitai**
An excellent flavored fruit with good eye appeal. Compare to Campari. Average fruit size 45 grams Very firm and early to mature. For greenhouse production only.

**Tomato Cocktail**

**Red Delight**
A round cluster harvest cocktail type. Average fruit size 55 grams (1.8 - 2.0 oz). A tall vigorous variety that is early into production and can be pinched or grafted. Firm, deep red shiny fruits, up to 10 per cluster, good shelf life, High Brix.

**Tomato Cocktail**

**Response**
A very early orange cocktail 14-16 fruits per cluster. Ave size 30-35 grams for Autumn winter and spring.

**Tomato Cocktail**

**Rugantino**
A specialty "Coeur de Boeuf" or oxheart, compact plants, multi blooming cluster. 200 - 240 g.
**Tomato Cocktail Tiger**

The plant has short internodes and is high yielding plant that is very early. Tiger has a short harvest intervals and resistances ToMV, Ve, F 0-1-2. Fruit is very firm, round and with an average fruit weight of 40 - 45 gr. (1.4-1.6 oz). High Lycopene.

**Tomato Cocktail Yellow Sun**

Can be picked loose or truss. Early harvest, fast to color, bright yellow

**Tomato Cocktail Zebrino**

Zebrino tomatoes are a round, small tomato, fruit size 30 to 40 grams (1 - 1.5 oz). Their skin changes from dark green to dark brown-red with green tiger stripes when fully ripe.

**Tomato Grape Amsterdam**

Average fruit weight 17 - 20 grams (0.6 - 0.75 oz). Amsterdam is a newer introduction with grape shaped fruit with excellent flavor. Brix 8+.

**Tomato Grape Bambelo**

Excellent taste, fruit size 10-12 grams. Deep orange, oval shaped. 15-17 fruit per truss

**Tomato Grape Cassanta**

Average weight 12 - 15 grams (approx. 0.4 to 0.55 oz) Cassanta is a Red Cherry plum tomato with a great taste. Very high vigor allows for long crops and variety performs well even under high temperatures. Single trusses allow for uniform fruit load.

**Tomato Grape Garincha**

Garincha is a beautiful, oval shaped grape tomato for heated greenhouse production. It has a vigorous attractive, easily balanced plant type. Uniform fruits are 0.4 oz (12-13 gr) in size with a shiny red color.

**Tomato Heirloom Aurea**

Aurea is a unique specialty tomato with low acid and very sweet taste. It has a very ribbed "ox-heart" shape or Coeur de Boeuf and lends itself to specialty markets or as an eye catching item on a farmers market produce stand.
Tomato
Heirloom
Black Velvet

Heirloom type tomato Black Velvet has an average fruit weight 115 to 170 grams (4.1 - 6 oz). dark, rich color make these small rounds stand out. Good flavor and a unique look.

Tomato
Heirloom
Cherokee

An extremely popular variety with great color, rich flavor good production. Fruits are medium-large, flattened globe, 8-12 oz. fruits. (220 - 335 grams) Dark shoulders and in dark pink color with rich interior color varying from purple to brown to green.

Tomato
Heirloom
Pineapple

Heirloom Hybrid – based on the classic pineapple heirloom variety is a fun garden favorite. Beefsteak shape bursting with juicy, mild, flavor. Yellow flesh shot through with pink. 280-400 Grams

Tomato
Heirloom
Quasimodo

Average fruit weight 280 - 300 grams (10 - 10.7 oz) and deep lobes, Quasimodo produces firm, high quality fruits also suitable for green harvest Quasimodo has long shelf life and the plant is very early with short internodes. High vigor

Tomato
Heirloom
Red Pear

Red Pear tomato is an Indeterminate tomato with average fruit weight of 6 - 8 grams (0.2 - 0.3 oz). Red Pear is an exotic looking tomato has a very nice shape, high yield and excellent taste! Very sweet, it's perfect in salads or as a healthy snack.

Tomato
Heirloom
Tangerine

Heirloom flavor and look, but maintains texture and flavor longer. 170-230 Grams

Tomato
Heirloom
ValleyGirl

Truss tomato Velley Girl is an indeterminate, red round, Heirloom type Hybrid. Average fruit weight 103 - 165 grams (3.7 - 5.8 oz) Approx 63 days to maturity.

Tomato
Heirloom
Yellow Pear

Yellow Pear tomato is an Indeterminate tomato with average fruit weight of 6 - 8 grams (0.2 - 0.3 oz). Yellow Pear is an exotic looking tomato has a very nice shape, high yield and excellent taste! Very sweet, it's perfect in salads or as a healthy snack.
**Tomato Outdoor Ekin**

Ekin is a medium to large beefsteak tomato. Ekin has early maturity producing firm, round tomatoes with good color. Fruit is slightly smaller than Meys 180-200 grams.

**Tomato Outdoor Grebe**

Grebe is a very high yielding determinate beefsteak tomato suitable for Open Field production. It is a strong, very early plant with a good leaf cover that helps protect against sunburn. Average fruit size is 250 - 280 grams (9 - 10 oz), slightly flattened.

**Tomato Outdoor Meys**

Meys is a large, firm, round tomato that has very high yield potential, with outstanding fruit quality, on a determinate plant. For single fruit harvest, Meys is a plant with strong vigor and early maturity, producing very firm fruits. 220-240 grams.

**Tomato Outdoor Ofri**

Ofri is large TY resistant, beefsteak tomato suitable for stacking and bush production. High yield and excellent fruit quality. Oval shape 250 - 400 grams.

**Tomato Outdoor Polina**

Polina was one of the first varieties introduced with TY resistance. A vigorous mid-season plant with firm fruit, uniform ripening. A green shouldered variety recommended for open field staking and bush growing systems. 180-240 grams (6.4 - 8.6 oz).

**Tomato Outdoor Skyway**

Skyway 687 is a vigorous determinate variety for the whole season. Has strong bacterial tolerance, XL to jumbo fruits, and is dualy suited for gas green or vine ripe production. With TYLCV, TSWV, Nematode, and F1-3 resistance.

**Tomato Roma Prunus**

Roma tomato Prunus is a plum shaped tomato with good yields and nicely shaped fruit. Loose harvest, year round production. Average fruit weight 90 - 100 grams (3.2 - 3.5 oz).

**Tomato Roma Shanty**

Roma tomato Shanty is a very strong, TYLCV resistant plant with very high yield potential. Shanty is a large fruited tomato with long shelf life and good production suited to outdoor or net house production.
For many years already, Beaufort has been the standard tomato rootstock. The superior vigor and cold tolerance of the variety give added vigor to crops, in soil as well as rock wool. High orky Root resistance.

DR0138TX. A great fit for vigorous and vegetative scions and for short crops.

DR0141TX increases the vigor and endurance of a scion and is especially useful for long crops and for scions that are both vegetative or generative in nature.

Strong, vigorous rootstock with a positive generative effect on the growth of the cultivar grafted on it. An Estamino-graft results in a well-balanced plant with good generative growth. It does not have an excessive vegetative effect on the cultivar graft.

Resistances: TmC5VF2FrNK. One of the most vigorous rootstocks available. Maxifort is used for the highest potential yield and is excellent for long crops. Great for soil and rockwool. Excellent on any variety but is especially good on weak crops.

Resistances: TmC5VF3FrN(P)Pto. Plant: vigor like Maxifort, amongst the strongest available in commercial rootstocks. Combination of high resistance to Fusarium race 3 combined with nematodes resistance makes the Multifort rootstock an excellent choice.

Bright orange fruits for loose or truss harvest. Good quality, medium vigor. 100-110 grams

Climstar is a vigorous cluster tomato variety with excellent balance and good setting. Uniform fruits with deep red color, nice green parts and very good shelf-life.
**Tomato Truss Curlew**

Curlew Roma tomato is an early indeterminate mid to early variety. Curlew produces a strong plant with a high yield potential. Average fruit weight 200 - 240 grams (7.1 - 8.5 oz). Curlew produces 5 - 7 fruits per cluster. Fruit is an oval shape.

**Tomato Truss Espresso**

Espresso is for single fruit harvest. Average fruit size 130 - 140 grams Round, brownish color with a firm fruit and early maturity.

**Tomato Truss Eto**

Fruit weight is approx 5.7 - 6.4 oz (160 - 180 grams) that is round, firm and with a long shelf life and plant is vigorous and fruit early maturing. Fruit is a Brownish red color with 5-6 fruits on cluster but fruit can also be single harvested.

**Tomato Truss Kommett**

Truss tomato Kommett is a newer variety with fruit size averages 155 grams with a high yield potential.

**Tomato Truss Lorenzo**

Yellow truss tomato Lorenzo has an average fruit weight 135 grams. Lorenzo is a vigorous yellow truss for spring and fall crops. It has very firm yellow fruits with good shelf life and taste.

**Tomato Truss Maxeza**

Maxeza is a unique truss tomato that combines high yield potential with good fruit color and firmness for heated greenhouse production. The plant is very vigorous and will maintain uniform fruit sizes of 4.9-5.3 oz. (140-150 gr).

**Tomato Truss Merlice**

Merlice truss tomato has a nice round shape and excellent uniformity. Merlice is highly resistant to powdery mildew. Truss tomato Merlice DRW 7812 has an average fruit size 155 - 160 grams (2.5 - 5.75 oz).

**Tomato Truss Orangaro**

Orange color. Average fruit weight 100 grams (3 oz). High Yield Potential. Can be harvested loose or as a cluster. Normal vigor, Mild flavor.
**Tomato Truss Sevance**

Medium TOV with PM tolerance. Long flat trusses with high amount of flowers. Strong against yellow calyx, great taste.

---

**Tomato Truss Speedella**

A year round cluster harvest tomato. High production plant with very uniform fruits. Average fruit size 130 - 150 gram. Medium / tall plant with strong vigour, very attractive truss presentation.

---

**Tomato Truss Tityra**

Fruit size averages 140 - 150 grams (5 - 5.35 oz.) produces, round red fruits for cluster harvest. Yield potential is excellent with 5 or 6 fruit per cluster although fruit size is a little smaller than those used for traditional US markets.

---

**Tomato Truss Topanga**

Topanga is a large fruit cluster tomato (TOV) which produces firm, deep red fruit with excellent shelf life. The dark green cluster stem maintains its fresh look and adds to the garden appearance. Topanga's fruit shape is flat, ribbed, good taste.
